

Pay and Improvements to terms and conditions plus colleague share.

I have received a number of enquires from members regarding the above.

The dental care package that was announced in December has been subject to detailed discussions on how this is to be rolled out. Detailed contracts have to be drafted with the preferred insurers and as soon as the service is ready to go live I will provide you with all the information.

I am attending a regional meeting on the 26th April where I will be updated on the latest position with regard to the pay talks and colleague share payments.

A Gadd
